Tender Grips

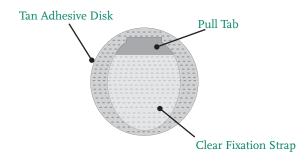

Technical Bulletin

Please read and follow the Instructions for Use provided with the Tender Grips prior to use

Tender Grips are a fixation device used to hold nasal cannula tubing in place. Tender Grips are intended for use in the home, outpatient, extended care, transport and hospital environments.

Product Use for Infants:

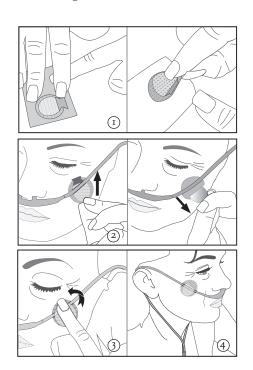

- 1. a-Open package and remove Tender Grips.
 - b-Fold back the Pull Tab. Peel the Tender Grip off the paper.
- 2. a–Center the Tender Grip on the infant's cheek underneath the cannula tubing with the Pull Tab pointing upward, then press down on the Adhesive Disk to stick to the face.
 - b-Using pull tab, peel the fixation strap back until a resistance is felt.
 - c-Position the cannula tubing in the center of the Tender Grip between the tan adhesive disk and the clear fixation strap.
- 3. Place the Fixation Strap over the cannula tubing.
- 4. Repeat steps 1-4 to attach Tender Grip to the other cheek.
- 5. Replace Tender Grips every 48 hours or sooner if needed.
