Hydrogel Adhesive

- Provides excellent skin contact for a high quality ECG signal
- Allows electrodes to remain on the skin for extended periods of time
- Easily removed and reapplied

Bacteriostatic Gel

- Inhibits microbial growth

Low Profile Electrode/ Pre-attached Lead Wire

- Reduces motion artifact
- Increases patient comfort

Extended Adhesive Life

- Fewer electrode changes

Radio-Translucent

- Electrode pads are virtually invisible under x-ray

- Holds NeoGuard® Temperature Probe securely to the skin
- Shields probe from radiant heat
- Hydrogel adhesive allows for repositioning
- Two sizes

- Soft, foam construction for comfortable arm stabilization
- Can be reshaped multiple times
- Bacteriostatic gel
- Two sizes
